PROJECT EXPERIENCE

Student Billing Management System
Full Stack Developer (Capstone 1 & 2)   2024 - 2025
Role: **Project Manager and Developer**

- Led a team of 5 to develop a system for managing student billing processes and tracking payment/transaction records.
- Designed the database, built user interfaces, and implemented core functionalities using PHP and My SQL.
- Coordinated team efforts to ensure project milestones were met successfully and on time.

Student Loan System
Back-end Developer (Group Project)   2023 – 2024

- Developed the Student Loan System using Java, applying Object-Oriented Programming (OOP) principles to ensure a scalable and maintainable codebase.
- Focused on backend development, including database integration, logic implementation, and API development.
- Collaborated with front-end developers to ensure seamless communication between the user interface and backend functionalities.
